

FINITURE **ESSENZA** / **ESSENZA** FINISHES

Materia viva, certificata, eco-sostenibile. Una proposta unica per varietà, dalle caratteristiche qualitative superiori, senza i difetti tipici del legno tradizionale. Riproducibili nel tempo, per molteplici ambiti applicativi, per superfici orizzontali e verticali. Le finiture PIRARUCU e TARSIE SAND si presentano come metamorfosi di un materiale naturale che attraverso la tecnologia scopre elevate performance ad alto tasso ecosostenibile: dal legno al legno...dalla materia ad una nuova materia che trascende codici sartoriali e tecnologici predefiniti affinché ogni progetto offra nuove declinazioni espressive e personalizzate.

Il modello ESSENZA è realizzabile in tutte le finiture di legno impiallacciato proposte da Vama Cucine.

A living, certified, ecosustainable material. A unique range of offerings, with superior quality characteristics, free of the typical defects of traditional wood, ready to be reproduced over time, for multiple application areas, on horizontal and vertical surfaces. Pirarucu and Tarsie Sand finishes are the metamorphosis of a natural material, which thanks to technology achieves high performance and ecosustainable quality. From wood to wood... from the material to a new material that transcends pre-set codes of workmanship and technology, making every project convey new expressive and customized interpretations.

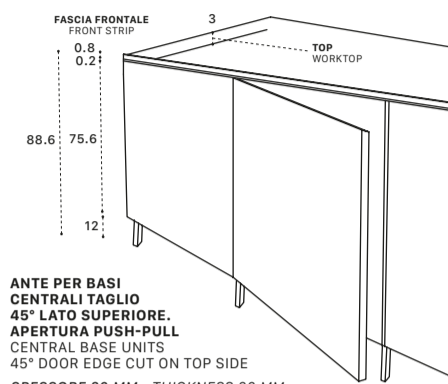

Essenza model is also available in all VAMA veneer woods selection.

LE COLONNE TERMINALI HANNO SOLO IL LATO ESTERNO A 45°, MENTRE LE COLONNE CENTRALI HANNO TUTTI I LATI QUADRATI (90°)
